Description

1. Open VS Code.
2. Name the .html file **church.html**
3. Title the HTML document **Free Will Baptist Church**
4. Recreate the web page above using HTML and styles (you may use standard CSS, but it is not required/needed; **style** is enough).
 - The font the website uses is **'Comic Sans MS'**
 - The blue coloring RGB code is **rgb(70, 130, 180)**
 - The pink coloring RGB code is **rgb(255, 0, 216)**
 - The gray coloring RGB code is **rgb(160, 160, 160)**
 - Picture and font sizes do not need to be exact, for as long as they at least look similar in size.
 - Spacing does not need to be exact, for as long as the margins and padding at least look similar.
 - Text needs to be cutoff the same as the picture everywhere (except for the footer), i.e. for the Free Huell Babineaux paragraph, "click" should be in a new line after "Please".
 - You can use **list-style-position: inside** for the **ul** to look like the one in the picture.

- Every centered element should remain center as you zoom in/zoom out (check the 3 images at the top as your basis).
 - You can remove page border using `<body style="margin:0px">`. This can be used to remove the white border from the navigation bar.
 - You may use CSS selectors (though it is unnecessary).
 - This activity's goal is to train your analytical skills and your ability to satisfy specific design requirements. Do **not** create your own design, nor add elements that are not in the requirements!
