

# ACT #26 Starting with GitHub

New Attempt

**Due** No Due Date **Points** 15 **Submitting** a text entry box

**SOFT DEADLINE:** 11/23/2023 12:05 PM

**HARD DEADLINE:** 11/23/2023 06:00 PM

The screenshot shows the GitHub 'Create a new repository' page. At the top, it says 'Create a new repository' and 'A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)'. Below this, there are two input fields: 'Owner' with a dropdown menu showing 'daibenangelo' and 'Repository name' with an empty text box. A hint below these fields says 'Great repository names are short and memorable. Need inspiration? How about [vigilant-fiesta?](#)'. There is a 'Description (optional)' text area. Under 'Visibility', there are two radio buttons: 'Public' (selected) and 'Private'. Below this, it says 'Initialize this repository with: Skip this step if you're importing an existing repository.' There are two checkboxes: 'Add a README file' (checked) and 'Add .gitignore' (unchecked). Below these, there is a dropdown menu for '.gitignore template' set to 'None'. At the bottom, it says 'Choose a license'.

## Instruction

Create a repository named "bootcamp" and push your bootcamp folder.

## Tools

GitHub, Git Bash

## Description

1. Login to GitHub ([create an account](#)  [https://github.com/signup?ref\\_cta=Sign+up&ref\\_loc=header+logged+out&ref\\_page=%2F&source=header-home](https://github.com/signup?ref_cta=Sign+up&ref_loc=header+logged+out&ref_page=%2F&source=header-home)) if you haven't yet).

2. Create a public repository titled **bootcamp**
3. Push the all of the contents of your **[bootcamp folder](https://kodego.instructure.com/courses/379/assignments/8704)** (<https://kodego.instructure.com/courses/379/assignments/8704>) to this repository.
4. Submit the link of your repository here for checking.
