

7.2 Demo Code

```
function runActivity() {  
  let science_grade = 82;  
  let english_grade = 93;  
  let adjustment;  
  let new_english_grade;  
  
  science_grade = 85 + 5;  
  
  adjustment = Number(  
    prompt("How much would you like to adjust the English grade?")  
  );  
  
  console.log("Science: " + science_grade);  
  console.log("English: " + english_grade);  
  console.log("Adjustment: " + adjustment);  
  new_english_grade = english_grade + adjustment;  
  console.log("New English grade: " + new_english_grade);  
}
```
