REF #1 CSS Fonts

- Selecting an appropriate font for your website is an integral part of design.
- You can either use a default font, or use a Google font.
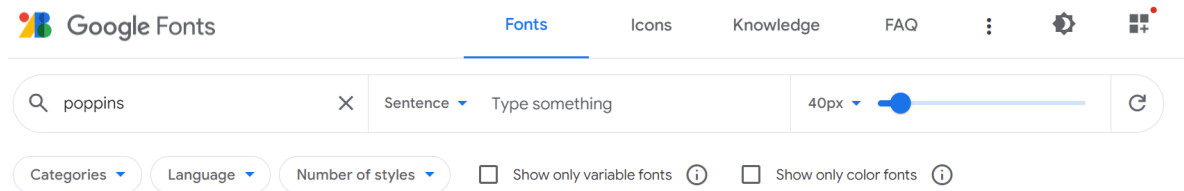

Using default fonts

| Font	CSS code	Preview
Arial	`font-family: 'Arial', sans-serif`	The Quick Brown Fox Jumps Over The Lazy Dog

Impact	`font-family: 'Impact', fantasy`	**The Quick Brown Fox Jumps Over The Lazy Dog**

Using Google fonts

1. Go to the **[Google Fonts website](https://fonts.google.com/)** ⎆ **(https://fonts.google.com/)** .
2. Browse and select fonts.
   - Explore the various font options available and choose the fonts you want to use.
   - You can use the search bar or browse through different font categories.

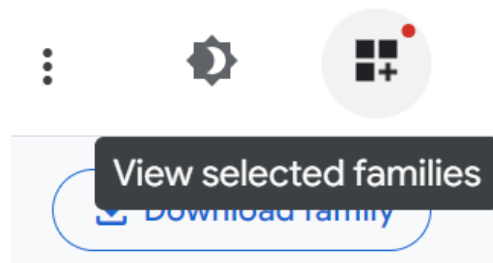

3. Select the font that you would like to use.

4. Scroll down and select the style you would like to use.

5. Select **View selected families** at the top-right of your navigation bar.

6. Copy the `<link>` tag from the embed code provided by Google Fonts.

◉ <link>   ○ @import

```
<link rel="preconnect" href="http
s://fonts.googleapis.com">
<link rel="preconnect" href="http
s://fonts.gstatic.com" crossorigin>
<link href="https://fonts.googleapi
s.com/css2?family=Poppins&display=s
wap" rel="stylesheet">
```

7. Open your HTML file in Visual Studio, and in the `<head>` section of your HTML, paste the `<link>` tag you copied from Google Fonts. You should be able to see your font now!
