ACT #52 Node Run

New Attempt

Due No Due Date   **Points** 10   **Submitting** a file upload

---

Instruction

Create a JavaScript file and have it run via Visual Studio Code.
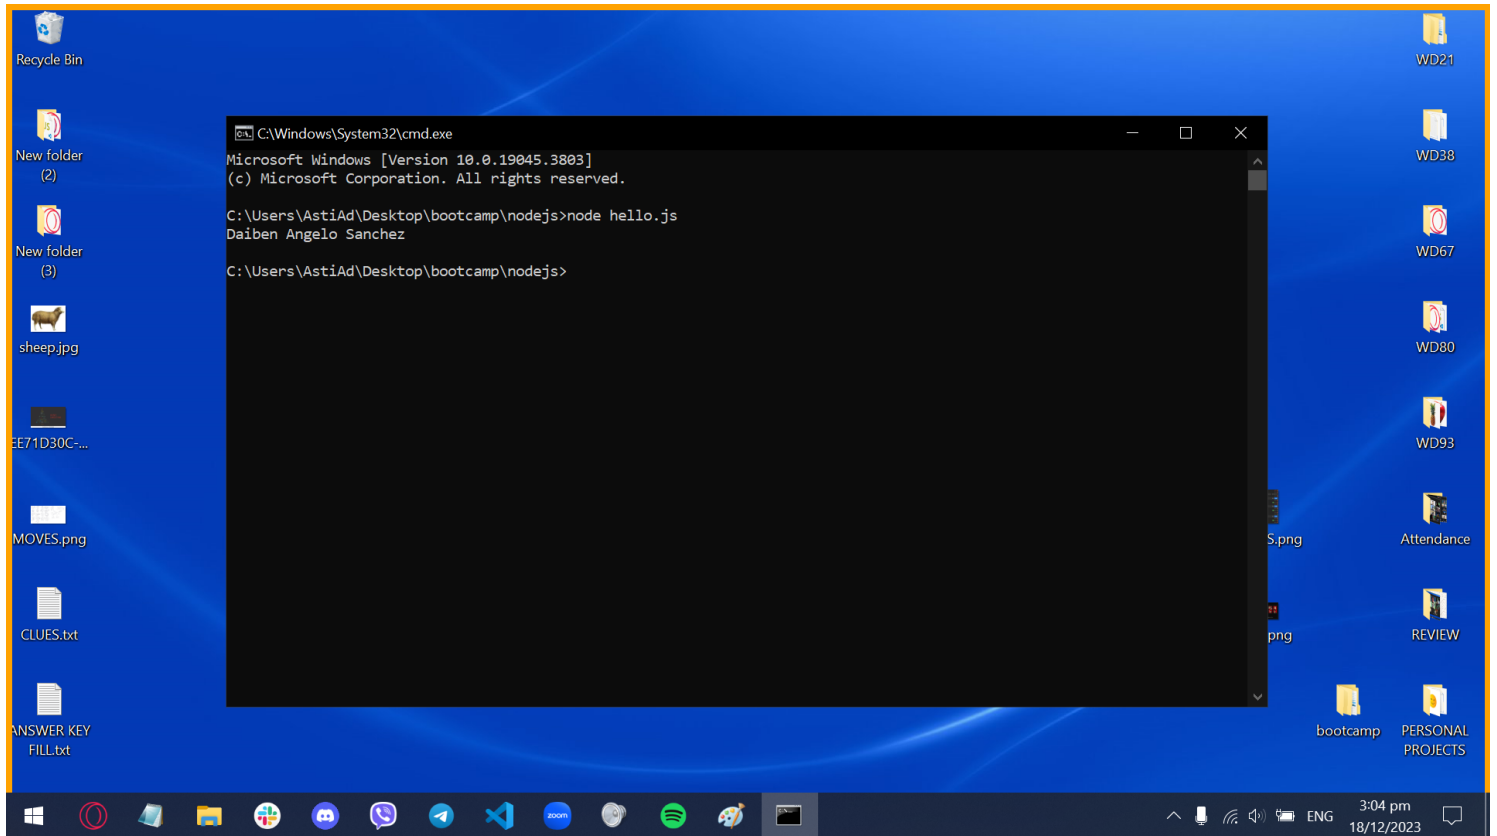

Tools

Node.js, Visual Studio Code

Description

1. **Download and install Node.js.** ↪ **(https://nodejs.org/en/)**
   - Select the LTS version.
2. **Download and install Postman.** ↪ **(https://www.postman.com/downloads/)**
3. Open Visual Studio Code.
4. Create a file titled **hello.js**
5. Add the following line:
   - ```
     console.log("[your name]");
     ```

6. Save the file.

7. Open a terminal in the same folder you created hello.js.

8. Run the following command: `node hello.js`

9. You should get a CMD output such as this one:

- Take a screenshot. Name the file **node.png**.
- Submit the file here as your submission.
