THIS IS A CONTINUATION OF ACT #10
(https://kodego.instructure.com/courses/379/assignments/8697)

About Me

Hi my name is Daiben

I enjoy teaching and listening to different genres of music.

Education

Saint Louis University

2014-2018

Experience

KodeGo Instructor

August 2022 - Present

Provided a comprehensive web development course.

Skills

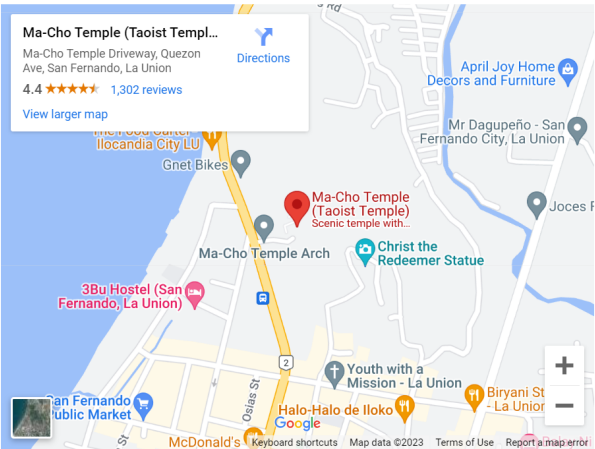

I find this very easy and fun to use!

I am excited to learn design.

This might be challenging!

Address

Sample output

Summary

Add to the web page you have created.

Tools

Visual Studio Code

Instructions

1. Open VS Code.
2. Create a folder named **img** in the same folder as your resume.html.
   - This will be where you place your images for this activity.
3. Open the **resume.html** you made in the previous activity and add to the sections.
   - For the **About Me** section, add a picture of yourself.
     - Doesn't need to be formal/professional. Any picture would do!
     - You can use the width and height properties to set your image dimensions.
       - `<img src="self_photo.jpg" width="200px" height="200px"/>`
   - For the **Education** section, add a picture of your school and/or college.
     - Link the picture to either your school's web page or social media page.
       - Make it so that the link opens a new tab.
4. Under Experience, create a new heading **Skills**
   - Search for images of HTML, CSS, and Javascript logos.
   - Place the images in your img folder, then add them to your webpage..
   - Add links to the logos. Make sure that the links open a new tab when clicked:
     - **HTML**: **https://html.com/** ⤷ **(https://html.com/)**
     - **CSS**: **https://developer.mozilla.org/en-US/docs/Web/CSS** ⤷ **(https://developer.mozilla.org/en-US/docs/Web/CSS)**
     - **Javascript**: **https://javascript.info/** ⤷ **(https://javascript.info/)**
   - Below the images, write a sentence about what you feel regarding your web development journey so far.
5. Under Skills, create another heading titled **Address**
   - Below, embed a Google Map location using `iframe`.
   - Don't use your exact address! Pick a landmark within your province.
6. Compress all your files, including the .html file and the img folder.
7. Name the compressed file **ACT11.zip**
8. Submit the .zip file here.

Notes and Tips

- Use the sample output at the top of the page to have a visual of what your output is supposed to resemble.
- Don't forget to review the previous lessons' materials and/or recordings!
