About Me

Hi! I'm Daiben Angelo Sanchez, and I work as a web dev instructor.

I enjoy teaching and listening to different genres of music.

Education

Saint Louis University

2014-2018

Holy Mary Academy

2010-2014

Experience

KodeGo Instructor

August 2022 - Present

Provided a comprehensive web development course to students from high school graduates to seniors that features basic, advanced, front end and back end technologies.

College Instructor I

September 2021 - June 2022

Delivered lectures, activities, and examinations to 2nd year, 3rd year and 4th year students. Served as thesis defense panel member. Conducted numerous extension work.

Information Security Engineer

July 2018 - January 2020

Handled daily security monitoring operations, including handling internal reports of potentially malicious data breach attempts.

Sample output

Summary
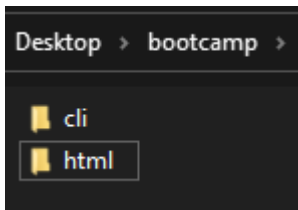

Create a resume web page.

Tools

Visual Studio Code or Notepad

Instructions

File organization (optional but recommended)

1. Open your bootcamp folder.
2. Create a new subfolder named **cli**
3. Place all of the files you have created so far in the cli folder.
4. Create a folder called **html**
5. Place all of the files you will make in this lesson in that folder.

Activity

1. Open Visual Studio Code.
2. Create a new .html file named **resume.html**
3. **Title the page** **(https://kodego.instructure.com/courses/379/pages/3-dot-0-introduction-to-html5)**
   [YOUR NAME] - **MY RESUME**.
4. **Using HTML elements** **(https://kodego.instructure.com/courses/379/pages/3-dot-0-introduction-to-html5)** , create a very basic web page about yourself.
   - Your website must have the following:
     1. A heading titled **About Me**
        - Under About Me, a paragraph about yourself. List your best traits.
     2. A heading titled **Education**
        - Under Education, list the high school(s) and/or college(s) you have graduated from.
     3. A heading titled **Experience**
        - Under Experience, list your past projects and/or work experience.
          - Specify a year for each.
          - If you have no prior projects/experience, just list **KodeGo graduate** as your experience.
   - Don't worry about the design too much! We will work on it in future activities.
   - Do not use any images.
5. Submit your .html file here as your submission.

Notes and Tips

- Even though your HTML code would still work without proper spacing and indentation, it is still highly recommended that you do for better code readability!

- Make sure that you constantly save your code every now and then by pressing CTRL + S. **It is your responsibility to keep your code safe in case of anything!**
- Every time that you save your code, both Visual Studio Code itself and Prettier would automatically help to format the code. Take note of the changes every time you save!
