ACT #25 Register for GitHub

New Attempt

Due No Due Date **Points** 10 **Submitting** a text entry box
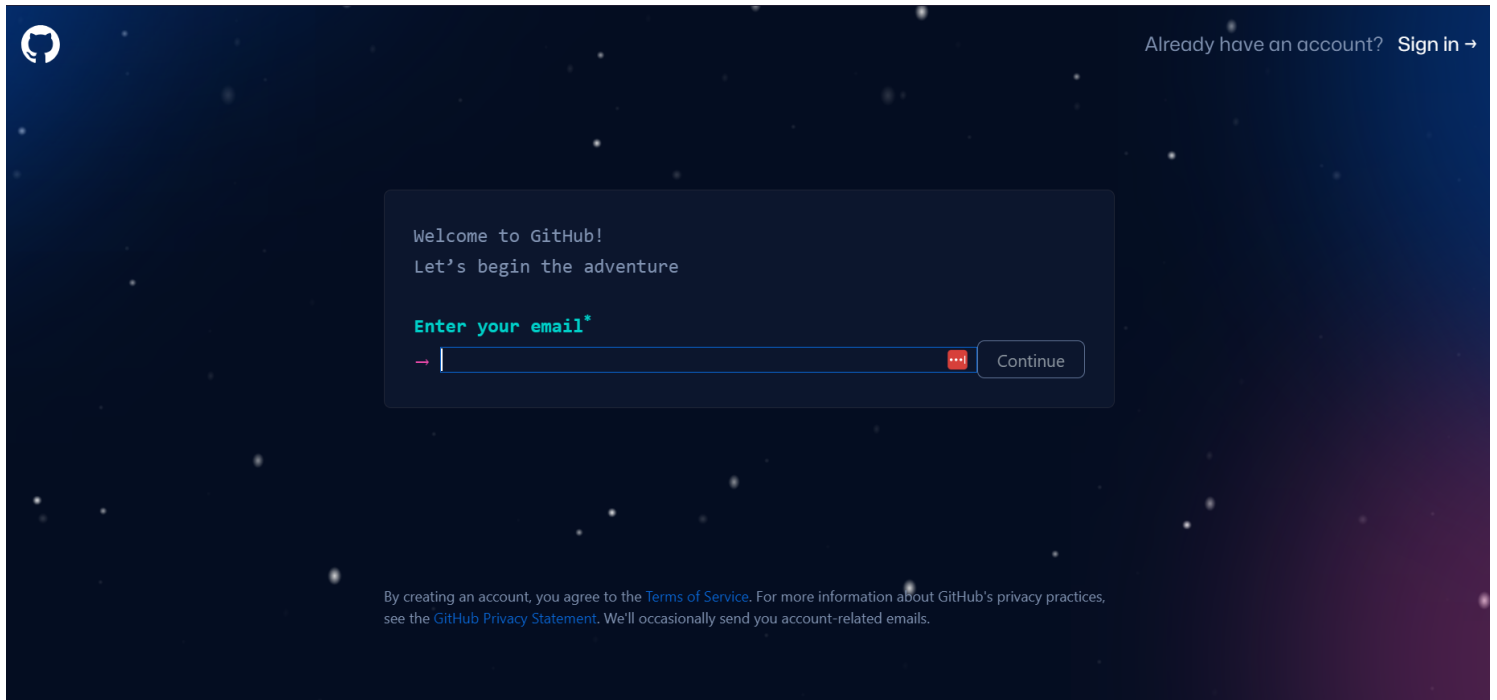

Instruction

Register for a GitHub account.

Tools

GitHub, Git Bash

Description

1. **Go to the GitHub account registration page.** (https://github.com/signup)
2. Register for an account.
    - Enter an appropriate email address, password, and username.

- Your GitHub account is an important item for all developers. Make sure to select a **professional** username!
- Make sure that your email address is accessible (i.e. you can still login and check your emails with it).
- Access your email address' inbox to get the verification code.
- GitHub would ask for a few other items. You can answer these however you want, but here are my recommended answers:
  - Would you like to receive product updates and announcements via email? **n**
  - How many team members will be working with you? **Just me**
  - Are you a student or teacher? **Student**
  - What specific features are you interested in using? **Collaborative coding**
  - Select **Free** when it asks for account benefits.

3. Once you have successfully registered an account, your GitHub homepage should look like this.
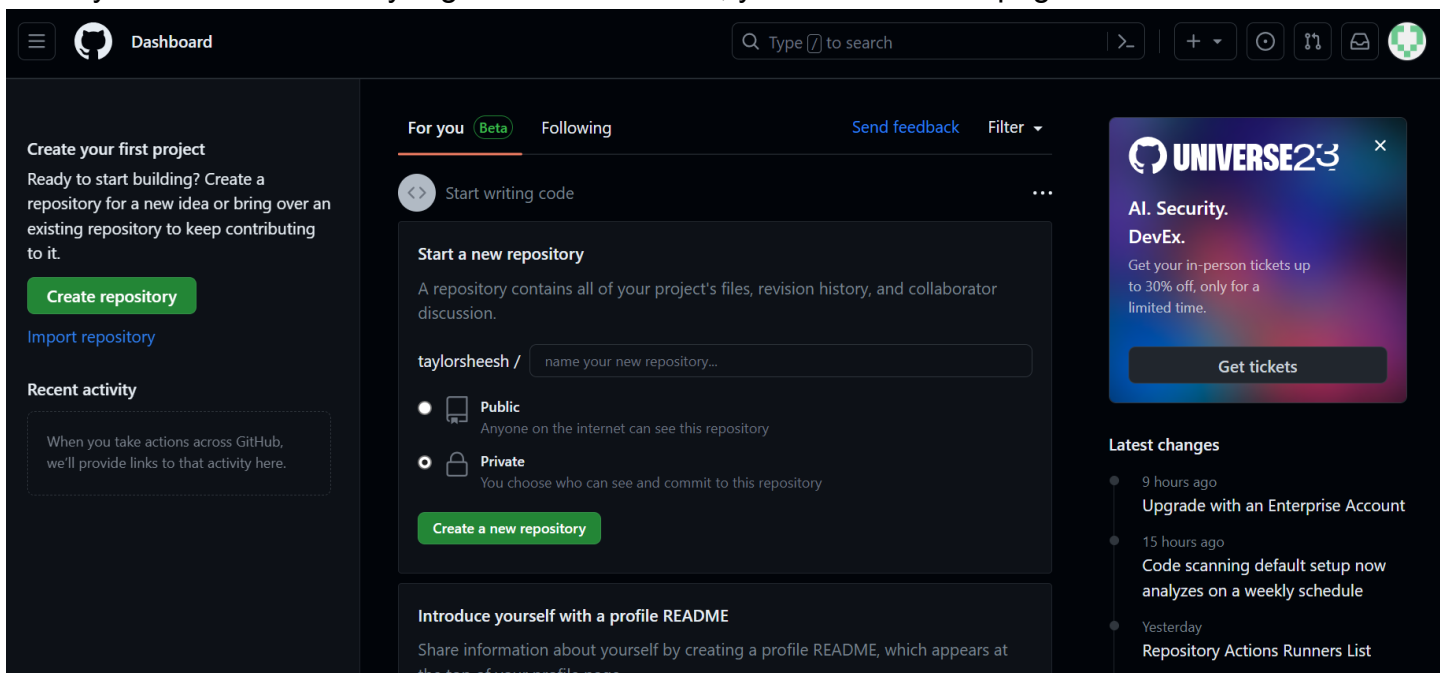

4. Go to your profile by clicking on your profile icon at the top right, then selecting Your profile.
5. Copy your profile URL, then paste and submit it here.
